

Lightweight External Couplers with Manual Closing

Couplers (also called **aligners**) are the most appropriate and effective devices for **quickly aligning two components of the pipe before welding**.

The most common type of lightweight couplers with manual closure, the first version of lightweight couplers, is the one with cross-arched bars that allow a 90° circumferential welding without removing the coupler.

Light Couplers with Manual Closing are available in sizes ranging **from 4" to 16"**:

- They are easy to use;
- They are not removed during welding;
- They comply with the requirements of the Machinery Directive 2006/42 / EC and of the 2014/30 / EU directive;
- 100% weldability.

Higher diameters are available on request.

PRICE:

Quotation on request.

Price list and **discount table** are available by contacting our Sales Department.

DATA SHEET:

MODEL CODE	TUBE SIZE RANGE (INCHES/MM)	SHIPPING WEIGHT (KG)
JL-ACC-4	4" / 102 mm	8,6 kg
JL-ACC-6	6" / 152 mm	14,4 kg
JL-ACC-8	8" / 203 mm	14,9 kg
JL-ACC-10	10" / 254 mm	23 kg
JL-ACC-12	12" / 305 mm	23,9 kg
JL-ACC-14	14" / 356 mm	31,5 kg
JL-ACC-16	16" / 406 mm	45,9 kg
