

Heavy External Couplers with Pump

The second version of heavy couplers is the one **with pump closing**. The most common type is the one that allows precise alignment of the tube **without removing the coupler itself**.

The **Heavy Couplers with Pump Closure** are available in sizes ranging from **18'' to 56''**.

- They are easy to use;
- They are not removed during welding;
- They comply with the requirements of the Machinery Directive 2006/42 / EC and of the 2014/30 / EU directive;
- 100% weldability.

Higher diameters are available on request.
